Editor's Note

HAJIRA NALUBANGA (MS)
District Information officer

Distinguished Ladies and gentlemen am always glad that every closure of the FY I am given this opportunity to pass on the information to you through the district magazine majorly focusing on the various departmental activities.

The aim of this magazine is to broadly enlighten more on the district's achievements availing all aspects say social, economic and political development.

Indeed in this publication I have been realistic that I should share with you an insight in detail about each of the departments and lower local government detailing various developments in the district.

Honestly before I crown it all let me take this opportunity indeed to thank the district chairperson, the chief administrative officer, chief

finance officer and other focal persons at the district for your an inequitable assistance that has made this publication a triumph for sure may the almighty reward you abundantly therefore never give up regardless of anything with this let me say **SPEAK LITTLE BUT THE TRUTH.**

Profile

Jinja district local Government is located in south Eastern Region, at the North eastern shores of lake Victoria and it is bordered by Mayuge District to the east, Kamuli and Iganga districts to the north, Lake Victoria to the South, Buikwe district to the South west and River Nile to the West. The district headquarters are located at Busoga square within Jinja municipality. The district has 2 counties comprising of 6 rural sub counties and 3 town councils, one municipality comprised of 3 divisions. There are 59 parishes and 399 villages in Jinja rural and municipality combined.

The district has a population of 489,000 persons and an estimated land area of 767.8sq. km. out of this, 65.8sq.km is under water i.e. 53.3sq.km is under open water and 12.5sq. km is under permeable wetlands. Land is under subsistence farming with an average holding of 1.3 hectares per house hold.

LCV Chairperson's Speech

GUME FREDRICK NGOBI
District Chairperson

I thank the councilors for being united and for keeping the local government alongside the technical people.

I realize that I have international responsibilities and I have been more often on the move out of the country but the council has been kept intact.

The people of Jinja this financial year have closed with good news in that we have eventually got the money to construct our home the Jinja District Local Government Headquarters. This was one of my ambitions when I was aspiring for leadership of this district.

I am glad to note that the infrastructures like the district roads and sub county/community roads have been worked on well except UNRA roads which at times are impassable.

As the Municipal council aspires for a city status, we are now starting to extend the industrial park outside the congested city. An example of these industries includes Chinese car factory that's coming on line, the cotton industry in Kagogwa near Mutai and the Kiira Car factory.

LAND: We are lucky that Land titles are being processed in Jinja and they are giving out deed prints at the Jinja Land office I appeal to people to use that opportunity to get titles to their land.

There have been relatively in adequate supply of drugs at the health centers and I'm appealing to the responsible people to be prompt in requisitioning for drugs from National Drug Authority.

The district experienced a calamity in Buwenge and Butagaya due to a hail storm where people lost life and their crops were destroyed but I thank those who came to their rescue like BIDCO.

NAADS: There is change in policy of the NAADS program and the government intervention in reviving NAADS will benefit the community because there's an effort to move away from Advisory services to real input.

HEALTH: There's a challenge in Health to do with personnel where they 435 staff on the Government payroll. The staffing level of qualified staff is at 57% of the required staff structure which is not good. The District has 435 qualified head of staff serving a population of about 500,000. this is a ratio of 1000 people for Health personnel. This is quite alarming and efforts are under way to improve on the staffing.

WATER: We have continued to supply boreholes and renovating them and we are in advanced stage to extend piped water in growth centers like Namaganga and Namagera.

In conclusion, i thank the technical staff and councilors and their private partners for the efforts they are putting in as a contribution to the benefit of people of Jinja.

I promised a very interesting year where efforts will be geared towards the district home.

Thank you.

HEALTH DEPARTMENT

DR.DYOGO NANTAMU
DHO

VECTOR BORNE DISEASE CONTROL

Malaria

The department managed to train 100 health workers from the private sector on integrated Malaria management, this was especially important since the first line medicines for the treatment of Malaria in pregnancy and management of severe malaria have been changed to artesunate IV from Quinine IV.

They also trained 51 Laboratory personnel in Quality assurance of laboratory malaria diagnosis supported by the Uganda Malaria Surveillance Project. This means that all government laboratories now have at least one laboratory staff well trained in Malaria Diagnosis and they follow them up on a monthly basis to ensure that they remain proficient.

Attained universal house hold coverage with free long lasting mosquito nets, more than 250,000 nets were distributed during this exercise. They have so far seen a 10% reduction in Malaria Cases this year; final figures will be available in June 2014.

200 bales of Global Fund RD 10 mosquito nets were distributed to all government and PNFP health facilities in Jinja District; these are to be distributed to pregnant mothers and children who have completed immunization with DPT 3.

Neglected Tropical Diseases

- ✓ Bilharzia, Intestinal worms and Trachoma are endemic in the whole district and the entire population is at risk.
- ✓ Schistosomiasis/ Bilharzia is mainly endemic in the 7 sub counties bordering the river and lakes, however the whole District has a network of interconnected water bodies especially vast swamps which people cultivate and these farmers were also treated. The target number of treatment for Schistosomiasis/ Bilharzia is 30,000 people with priority given to schools and communities that lie within 2 km of the lake and river.

Training; The department managed to train twelve(12) Trainer of trainers TOTs) at district level, 24 Sub county Supervisors, 56 Parish supervisors, 1,275 Community Medicine Distributors and 1,234 teachers.

Results; The coverage was good for Zithromax at 92.6% and this was as a result in part due to the integration with child days and the funding of two outreaches per health facility coupled with the involvement of almost all the health workers. These figures are calculated using the census done by the CMDs which put the population at 359,003 as opposed to the UBOS figure of 488,000 people in Jinja.

Bujagali Dam Health Effects Monitoring

The department periodically tests the water and the riparian communities near the Bujagali dam to determine the effect of dam construction on vector-borne diseases/water related diseases.

Parasitological analysis of bilharzias in humans

The department sets out to assess the point parasitological prevalence and intensity of Bilharzias infection in the three transects of Kalange-Makwanzi (Upstream) and Kikubamutwe-Buyala. (Downstream) and the reservoir/Lake formed as a

result of the completion of the Bujagali dam construction.

A total of 93 stool samples were collected from a population of 520 people. Of the 93 samples, only 18 people (19.3%) were infected with Schistosomiasis which was a small decrease from the previous sampling. All infections were by the intestinal type of Schistosomiasis (*Schistosoma mansoni*). Infection with Schistosomiasis was higher at the upstream site (20%) and lowest at the downstream site (Kikubamutwe) transect (18.6%). None of the 117 samples tested positive for *Schistosoma haematobium*, the urinary type of Schistosomiasis. The majority of infected persons at all sites had light intensity (83.3%) up from 79.15 while heavy intensity was back to 0% while moderate intensity flattened out at 16.6%

Snail Vector abundance

Both vector snail species namely *Bulinus sp* and *Biomphalaria sp* showed a slight increase except at the reservoir transect where the *Biomphalaria sp* numbers almost doubled from 27 to now 46 and it may also be significant to note that the other non-medically important species numbers also almost doubled from a figure of 63 previously to 131.

Biomphalaria sp was the more abundant vector snail species

accounting for 26.1% of the total sample while *Bulinus sp* was only 8.3% of the total sample showing a slight decline in the percentage of vector snails at 34.4% of total sample collected.

Faecal coli forms

Shallow human-water contact points upstream (96 colonies per ml), Reservoir (94 colonies per ml) and downstream (80 Colonies per ml) showed heavy contamination which shows a very high risk level. Water from the deep middle part of the lake had a lower coli form count of 3.5-7 colonies per 10 mls of water, indicating high dilution and in this case a moderate risk level (1-10 colonies per 10 ml of water); There was a slight increase in coliform counts at the downstream transect from 80 to 94 colonies.

Water with ten colonies per ml and above is considered unsafe for human consumption. The micro-organisms of medical importance were predominantly *Salmonella sp* and *Shigella sp*.

Blackfly/Mbwa Fly Sampling

No medically significant species of black flies were detected in the area. Medically important species of Simulium flies mostly live in sheltered areas of the river/stream in fast moving waters where they breed on crabs and Twigs depending on their species and sub species.

PNFP Supervision

We supervise 14 Private Not for Profit health facilities to ensure that they are implementing the work plan as agreed on in the MOU with the district. We also advocate for Public Private Partnership in Health service delivery and carry out joint trainings.

HIV/AIDS

Jinja district has responded to HIV/AIDS in a number of ways after realizing that the epidemic has remained a challenge to the district workforce and the entire population. The district has an HIV prevalence of **5.1%** compared to the regional **5.8%**. The district with a population of 514,300 has about 26,229 citizens who are HIV positive. HIV prevalence among adults of between 15 < 49 years is about **5.4%**, with females being affected more than the males (females 5.5% and Male 5.3%)

Funding for HIV/AIDS activities

The funding was mainly from two sources i.e. from Primary Health Care (PHC), and from the CDC/TASO grant that contributed 162 million.

Partners contributing to the HIV/AIDS response

TASO Jinja, ADOVIC Jinja branch, AIC Jinja, Restless Development, Children's AIDS fund, JIDU, FLEP, RHU, SNU, Straight talk Uganda, Hospice Jinja, AOET/IRCU, SRHR Alliance, Child Fund, Sustain

Jinja Hospital, JCRC Kakira, JIDNET, TAAG, and JINASO among others.

Interventions; The interventions are based on combination HIV prevention, care and treatment.

The interventions include;

1. HIV Counseling and Testing
2. Elimination of Mother To-Child HIV transmission
3. Treatment of Sexually Transmitted infection
4. Provision of Condoms
5. Provision of ART to the infected and for post-exposure
6. Provision of sexual and Reproductive Health services,
7. Safe Male Circumcision
8. Behavioral Change Communication.

World AIDS Day commemoration at Kagoma Primary school

World AIDS Day is commemorated world over on 1st December of every year. It is not for Joy but to remember the adverse effects that we have suffered due to HIV and AIDS. Jinja district joined the rest of the world to commemorate this day in Buwenge rural sub-county, in Kagoma County. The activity was spear headed by the district through the district health office and with support from different partners and the day was a success.

Some of the members during the Commemoration of World Aids day

Members of JIDU people with disabilities sensitizing the community on HIV prevention

Leprosy Programme Performance

Tb/Leprosy control section of the health department conducted several activities, which included:- Global Fund, TASO and PHC supported Technical Tb Support supervision to the 30 Health facilities that offer TB services, External Quality Assessment for TB diagnosis (District Lab Focal person and NTRL blinded re checking of Tb sputum smears done by the labs in the district), TB/Leprosy Surveillance and Quarterly reporting to MOH, NTLP M&E Office and TB/HIV collaboration.

The LCV Chairperson listening to health worker during an HIV/AIDS campaign

A team of HSD TB focal persons and DTLS giving feedback to staffs of Walukuba HC IV (Global fund TB support)

\Case finding/ Tb Case detection

At an Incidence rate of 136 new smear positive Pulmonary Tb cases/100,000 population(WHO, 2012), Jinja district expected to detect 686 new smear positive Pulmonary TB in 2013, The District managed a Case Detection rate of 389/699(56%), below the district target of 70% but slightly higher than the previous year's CDR of 363/682(53%).

Case Notification Rate (CNR)

= all TB (i.e. all new P/Pos, P/ Neg, No Smear done) +Extra pulmonary TB and relapses that are smear/bacteriologic ally confirmed) cases notified divide by the estimated population in the catchment area multiplied by 100,000. Jinja Notified 389 new P/Pos, 663 New P/ Negative, 24New NSD, 31 Smear positive Relapses and 71 Extra Pulmonary Tb.CNR was 1178/514300 cases notification rate per 100,000 populations.

Case holding (Tb treatment Outcomes)

DHO's Office through the DTLS evaluated a Cohort of 1162 Tb patients that were diagnosed and initiated on treatment in 2012. Considering part of that cohort of 363 New smear Positive PTB for treatment Outcomes; Cure rate73/363 (20%), Treatment Completion Rate 180/363(50%),death rate 25/363(7%), Treatment Failure Rate 3/363(0.8%), Lost

to Follow up 56/363(15%) and 26/363(7.2%) were Transferred to other districts. The Treatment Success Rate (TSR) which is cure rate and TB treatment completion rate was 70% above our District Target of 65% but below W.H.O and MOH target of 85%. The TSR improved from 59% in 2012 to 70% in 2013.

TB/HIV Collaboration activities

The W.H.O and MOH Uganda, recommend that 100% TB patients are offered HCT, 100% TB/HIV co-infected patients are started on ART and Septrine prophylaxis (CPT), WHO further recommends that all HIV patients are screened for TB at every visit. In 2013, Jinja district identified and reported 1266 Tb cases to MOH, National TB and Leprosy programme (NTLP) i.e. TB Notification Rate 1178 Tb cases/514300 Jinja Population Per 100,000, and also identified 32 cases (P/Pos Failure and Lost to Follow) and 56 Tb cases were P/Neg and No smear done Relapse,

Failure or Lost to Follow.

Jinja district offered HCT to 840/1266 Tb cases reported (66.4%) below 100% district and MOH target, 416 Tb patients were found HIV positive (CT₁) hence 49.5% of TB patients being Co infected with HIV, of these 416 TB/HIV co infected Tb patients, 414(99.5%) were on CPT and 226 (54.3%) are on ART below WHO and MOH target of 100%

TB/Leprosy Quarterly reporting to NTLP, MOH

The district achieved 100% timely and complete reporting,

No Leprosy case was reported by Jinja. The DTLS attended 4/4(100%) NTLP-Zonal TB/Leprosy meetings in which S/E Zonal performance was reviewed and best practices discussed.

Multidrug Tb (MDR TB) services: 4 MDR TB patients were initiated on treatment in 2013 and Jinja Hospital has capacity to diagnose MDR TB through gene X-pert testing i.e. Nucleic Acid amplification test (NAAT)

Health promotion and Education

Health promotion and Education is a service in the health sector; that creates awareness about health problems in terms of diseases, conditions and health related problems, which are potential risks to the people's social living standards.

In other words Health promotion and Education plays a great role in mobilizing and triggering people's demand to use the available health care services. It empowers them to increase control over their own health individuals, groups or families.

The Health promotion and Education service also includes the components of communication, collaboration and coordination with Human resource within the sector, other sectors/departments, the partners or stake holders for health care services at all levels.

Achievements

- Examined school health parades in twelve primary

schools and two secondary schools.

- Detected learners with health problems gave health education talks to the various school communities and referred the affected learners to the respective near health facilities for management of their conditions.
- Visited and discussed about nutrition, control of diarrhea diseases and malaria with family members of six homes in Wairaka landing site.
- Had four successful Radio talk shows on; the relationship of Alcohol consumption and HIV infection; the prevention of childhood vaccine preventable diseases; the relationship of multiple, concurrent and serial sexual partner practice and the increase of HIV infection prevalence in communities and the relationship of Tuberculosis infection and HIV infection in society.
- Participated in the Radio promotion of ORS and ZINC remedies for the control of diarrheal diseases among children.
- Coordinated three quality of healthcare services supervision successfully.
- Participated in reviewing and updating the National quality of healthcare supervision tool.
- Conducted one health facility staff members discipline meeting and has registered fair improvement in practice.

- Participated in disciplining three members of staff from different health facilities against their irregular attendance on duty and improvement was achieved
- Participated in short listing and interviewing Assistant Health Educators to have more providers of the respective service in the district.

Some councilors from Education & Health committee during drug inspection in the Health Centres of Mafubira, Wakitaka and Bugembe.

PRODUCTION AND MARKETING SECTOR

Dr. Kiwemba Stephen
DPMO

ACHIEVEMENTS

Crop Department

Nakabango district farm has continued to support farmers and increase on their farm production thereby increasing household income and food security. Banana and coffee production are the priority crops for Jinja district. At Nakabango, banana and coffee production is promoted through research and extension. Research is working on a number of banana lines. These

are being tried for adaptability and palatability.

The extension part of the farm has over four acres of the banana crop and clonal coffee. Agronomic practices in banana and coffee management are demonstrated to the various stakeholders who visit this farm. Among these are the primary and secondary schools, tertiary institutions and hosting students on their internship.

In financial year 2013/2014, local revenue was realized from sale of banana suckers and banana bunches.

The new banana crop (shown in the picture with intercrop of soya bean) has varieties which are already adopted by the farmers like AGT and Mpologoma. A few dessert bananas are promoted and these include apple banana i.e. Sukari Ndizi and roast banana i.e. Gonja.

The coffee sector supports farmers by providing them with agronomic practices in coffee management.

A coffee nursery shed has been constructed in FY 2013/2014. This will provide farmers with coffee seedlings at a slightly cheaper price.

Other achievements and activities are outlined in the report. All this has been achieved by a team work of five Agricultural Extension Workers and the District Agricultural Officer.

Using the BBW control funds from MAAIF interventions were carried out in the sub counties of Buyengo, Busede, Mafubira, Budondo, Buwenge and Butagaya and in the Town councils of Buwenge and Kakira and they include the following:

- Awareness creation at the District and Sub-county level through one radio talk show, 99 radio jingles and 8 sensitization workshops.
- Training of Trainers (TOTs) in BBW control at sub-county level. These carry out demonstrations at parish level.
- Creation of awareness at Parish level and official lunching of the BBW interventions.

- Listing of households with gardens affected by the BBW is on-going.
- 16 demonstrations on use of cost effective and farmer friendly technologies such as use of JIK detergent, Male bud (epumumpu) removal and cutting down plus proper disposal of infected plants were carried out and these are on-going.
- Establishment of farmer field schools in the sub-counties is on-going.
- Task force control committees comprising of: LC III Chairpersons, Sub-county chiefs, Community Development Officers, Sub-county NAADS Coordinators, Sub-county Agriculture Extension workers, Chairpersons of Sub-county Farmers' Forum were formed and trained in BBW control by-laws.
- BBW control by-laws were adopted in the sub counties of Budondo, Butagaya, Mafubira, Buyengo, Busede and Buwenge T/C. But these by-laws have not been enforced therefore Sub-county authorities should help in enforcing these Bye-laws.

The innovations by the department in the control of BBW include the following:

- Use of Plantlet tissue culture instead of the Banana suckers which could be infected with BBW. 1,000 Tissue culture plantlets were distributed to 5 farmers i.e. Mubeezi Ruth of Bulugo,

Kanyiriri of Namulesa, Kakuku of Lwitamakoli, Tusubira of Bulakabya and Gavamukulya of Buwekula.

- Use of farmer field schools approach in each sub-county.

Nakabango District farm

The farm has continued to meet its' intended objectives which include:

- Demonstration of appropriate agricultural technologies
- Multiplication of clean planting materials
- Testing of the newly released crop varieties

The activities found on the farm include the following;

- Popularizing and testing high yielding seeds of ground nuts for example 5R which yields 800 kg from 80kg of seed per acre, soya bean Mak 3N which yields 800kg from 50kg of seed per acre by NARO researchers.
- Promotion of banana production through testing of the different bananas on taste and quality.
- Two acres of sweet bananas, Gonja and edible bananas for production of suckers.
- About 225 mother plant mangoes for future use as scions (grafting stems)
- A fruit nursery is being established and this will produce 10,000 seedlings for coffee which will be for local revenue.
- A dairy goat demonstration unit

- A demonstration unit on apiculture i.e. bee farming.
- 10 acres of cassava multiplication garden for the District Youths. The poultry incubator for the Youths is not fully functional.
- 11 acres being used by Special Interest Groups for example Zibondo Association - 2 acres, St. Andrews P/S - 2 acres, Namulesa Moslem P/S - 3 acres, Nakabango Elderly Peoples' Association - 4 acres.

A dairy goat demonstration unit using locally available materials at Nakabango District Farm

High yielding coffee at Nakabango District farm

Inter cropping of Bananas and pineapple at Nakabango.

Research on Banana varieties for production and palatability at Nakabango.

FOOD SECURITY STATUS

Up to 90% of the households in the District are food secure except for a few areas in sugar cane growing sub counties of Busede and Buyengo.

However there are circumstances that could lead to a state of food insecurity in the District if they are not handled and these include:

- Ever declining soil fertility which directly affects crop yields
- Effects of climate change like prolonged dry spells, erratic rains and hailstorms.
- The threat of major crop pests and diseases especially Banana Bacterial wilts disease which is presently estimated to be at 20%, Coffee twig borer and cassava brown streak disease.
- Over reliance on sugar cane growing at the expense of food crops yet at the moment the farmers are being paid peanuts.
- The collapsing of the poultry industry due to the expensive feeds yet their quality is poor.
- Rampant animal diseases like African swine fever in pigs, Newcastle and Gumboro in poultry which caused high mortalities.
- Rampant theft of animals
- Decreased fish catches from the natural waters.
- High cost of production due to expensive inputs such as fertilizers, garden tools, improved seeds, agro chemicals.
- Low quality of agro inputs (fake products on the market)

- The urban areas of the district still import food stuffs (bananas, cassava, potatoes, beans & others), animals (cattle for slaughter, goats, chicken & others) and animal products (milk, pork) from the neighboring Districts.
 - The rural areas of the District generally produce sufficient food for their consumption and little for sale. Farmers are called upon to increase the production of the above items such that we reduce cash outflow from the District.
 - The farming community should embrace the opportunities created by Agro-ways which is focusing on reducing post harvest losses in maize and beans through proper storage and value addition.
 - NGOs and development partners are called upon to assist the farmers in Jinja District in the following areas:
 - ✓ Irrigation to avoid crop failure due to erratic rains
 - ✓ Value addition and processing of agricultural produce
 - ✓ Market linkages and market information
- delivering services to their members efficiently. These SACCOs are categorized by Name, location, Membership and savings portfolio as shown in the table below:
- Kakira Sugar Employees SACCO in Kakira T.C has 1420 members and the savings portfolio is shs. 2,350,000,000.
 - Jinja Municipal SACCO in Central Division is comprised of 400 members and the savings portfolio is shs. 570,000,000.
 - Jinja Municipal Teachers in central division has 450 members and their savings portfolio is shs. 620,000,000.
 - Budondo SACCO in Budondo Sub County has 1200 members and 220,000,000 shs as savings.
 - Nakanyonyi Good Shephard in Bugembe T/C has 1040 members and their savings portfolio is 450,000,000.
 - Mafubira Rural SACCO in Mafubira Sub County has 340 members and 226,000,000 shs as savings.
 - Bidco Uganda in Masese has 400 members and 314,000,000 shs. as savings.

Commercial services

Under this section, there was general Inspection, Supervision, Audit and training of SACCO leaders and membership continued throughout the year by office of the District Commercial officer.

In a special way, the commercial officer appreciated the following SACCOs that excelled in

However, the following SACCOS had challenge as below:

- Butagaya SACCO in Butagaya sub-county had misappropriation of funds and the case was reported police and the manger was arrested.

- Bososa SACCO in Masese had misappropriation about funds and the case was reported to the police and the manager was arrested.
- Busede SACCO in Busede Sub County where members failed to pay back loan to MSCL and the SACCO is under investigation by registrar of cooperatives.
- Bugembe Tukulere Wamu SACCO in Bugembe T/C where members failed to pay back loan to MSCL but the SACCO agreed with MSCL to amend the loan so that repayment would be made with minimum effort.
- JOYFORD SACCO in Buwenge Rural failed to pay back loan to MSCL and the SACCO Management agreed with MSCL to Amend Loan so that repayment would be made with minimum Effort. However SACCO is still open.
- Jinja District Health Workers SACCO in Central Division had Misappropriation of funds and the Current treasurer is failing to account for lost Monies and the case was reported to police and special Audit is still going on.
- Mpumude C3 in Mpumudde Kimaka has a problem of governance and a special general meeting was called to review performance.

FISHERIES DEPARTMENT

The department has continued to popularize the fish farming in

cages and conducting monitoring, control and supervision on Lake Victoria. Sensitizations of fishers on good fishing practices were done. Demarcation and monitoring of fish breeding areas was also done.

The department will continue implementing the same activities FY 2014/2015 to ensure increased fish production and

sustainable use of the fisheries resource. The activities will include;

- Set up 1 cage for fish farming demonstration at Masese
- Carry out MCS on Lake Victoria.
- Sensitization of fishers on good fishing practices at 6

BMUs of Masese, Wairaka, Kisimal and II, Ripon and Wanyange.

- Insurance of boat and servicing of engine
- Demarcating and monitoring of fish breeding areas of Masese, Kisima II, Wairaka and Wanyange.

Commercial cage fish farming at Masese promoted by Jinja District fisheries

Fish cages made out of locally available materials (Bamboo) at Masese

Fish cage demonstration units by the Jinja Fisheries Department at Masese

Commercial cage fish farming feed storage structure at Masese

ENTOMOLOGY DEPARTMENT

The day-to-day activities of the entomology department hinge on applied entomology which covers insects that are either beneficial or harmful to human beings or animals.

Among the harmful insects, the two major ones are ticks and tsetse flies. However,

routine pest control activities on domestic animals to a great extent take care of the ticks. Consequently, the department's emphasis is on control of the tsetse fly. The control method used involves use of insecticide impregnated traps that are deployed in tsetse fly prone areas, especially along the banks of River Nile.

Regarding insects of economic benefit, the honey bee is our

focus of interest. The honey bees provide pollination services, thereby playing a vital role in food production and overall agricultural productivity. Without such pollination, we would see a significant decrease in the yield of crops. To this end, the department promotes commercial bee-keeping through equipping farmers with the relevant knowledge and skills.

The Senior Entomologist during the inspection of the Bee hive at Nakabango District farm

New banana garden for multiplication at Nakabango District Farm

- Conducted a technology window shopping tour to Kabarole District. An action plan was developed and lessons learnt have been incorporated in the 2014/2015 work plan at various levels.
- Re-tooling of the crop department office with a computer and procurement of equipment for the Information, Education and Communication (IEC) centre being established.
- Emphasis in 2014/2015 will be put on follow up of the NAADS secretariat for the pledge of the Nakabango Chain link fence and the acquisition of the Land title for Nakabango District Farm.

NATURAL RESOURCES DEPARTMENT

Baruzalire Fred – AG. DNRO

Achievements

- The Land office fully computerized and is one of the major sources of Local revenue generating over 180,000,000/= (one hundred and eighty millions).
- The department has been able to process Butagaya sub county headquarters
- land Deed plans and a freehold Land Title and they are expeditiously processing the one of Buwenge Sub County.
- 1,300 Deed plans and 800 Land titles have been generated from Jinja for the whole of Busoga region this financial year.
- In collaboration with National Forestry, tree farmers have accessed 30,000 seedling with support of the tree fund.
- 15 kilometers of wetland boundaries opened and demarcated with collaboration with Ministry of water and Environment in Bugembe, Kakira and Wairaka.
- 100 sites inspected for enhancing physical planning in the District and
- 25 building plans approved which has generated 4,147,060/= for the district.
- The Environmental focal point persons and other technical staff of the District were sensitized on sound Environmental Management.
- An awareness creation meeting was held for industrialists for Jinja district to form a forum for partnership and dialogue.
- 7000 seedlings were planted on Wanyange hill in partnership with NEMA.
- 36 compliance inspections were carried out in industries, schools and other areas.
- 5 EIA reviews conducted including one for the proposed Jinja industrial park.

- 250 Tree seedlings planted on the eastern Banks of River Nile at Kiira primary school to commemorate world environment day together with Eskom on 5th June, 2014.

Challenges

- Under staffing levels in the sector
- Poor working environment in the dilapidated Natural Resources sector building

which require urgent renovation.

- Lack of official means of transport hamper field work activities.

Tree planting at Wanyange Hill

District Environment Officer, Maganda Moses sensitizing the community on wet management at Wanyama - Bugembe

WORKS DEPARTMENT

ENG. BUYINZA JOSEPH,
District Engineer

Jinja District has road net work of 204Kms, classified in three classes as indicated below:-

District roads, community Access Roads and Central Government Roads.

ACHIEVEMENTS

Routine maintenance

The district carried out routine maintenance of district roads on a net work length of 146.7km for a period of 9 months using the road gangs.

The roads which were worked on include:-

- Lubanyi-Buwenge-6.8kms,
- Kabowa-Budiima-21.4kms,
- Matumu-Buwenge-11.2kms,
- Namagera-Bubugo-6.9kms,

Routine maintenance

The district carried out periodic maintenance of the following roads:-

- Buwekula-Wanyange-5.6km,
- Mabira-Buyengo-19.6km,
- Kaitabawala-Lukolo-13.5kms and
- Namulesa-Ivunamba-5.6kms.

Rehabilitation

The district carried out rehabilitation of community Access Roads under the funding of African Development Bank and the following are the details:-

Budondo Sub County

The following roads in Budondo sub county were rehabilitated:-

- Bwase-Bukose–Bwase-2.7kms,
- Bwase-Naluwerere Road-1.4kms,
- Kyomya-Central-Kyomya East Road-4.2kms,
- Buwagi Central Buleeba-5.0kms.

Busede Sub County

Bugaya.Toola-Wampologoma-Kigalagala Road -5.6kms and Kasozi-Itakaibolu Roads-10.2kms were also rehabilitated.

Mafubira Sub County

The following roads in Mafubira were rehabilitated:-

- Wakitaka school-Mosque Road-3.7kms,
- Buwenda T/C-Swaga Road-7.3km and
- Musima-Kalungami Road-4.9kms.

Butagaya sub-county

The following roads were also rehabilitated in Butagaya sub county:-

- Mpumwire-Kyebando-Kagoma Road-4.1kms,
- Kitengesa-Bugerere-Busooba-4.7kms,
- Kibundaire-Bukwanga-Matuumu-6.1kms,
- Kisozi T/C-Budiima C/U Roads-3.3kms.

WATER DEPARTMENT

ENG. EREEMYE DAVID,
Water Engineer

The District coverage as at 30th May, 2014 is 65%. Functionality of water facilities has greatly improved at the current 93% functionality. Sanitation coverage as at 30th May 2014 is approximately 84% coverage.

Major Achievements

- Constructed 10 deep boreholes.
- 04 deep bore holes were constructed funded by child fund.
- 60 old water sources were analyzed for water Quality.
- Construction of one public Latrine at Bugembe H/CIV under LGMSD and the work is ongoing.

Other Achievements

All software activities e.g. continuous mobilization and sensitization, formation and training of water and sanitation committees, advocacy workshops, DWSCC meetings and software mobiliser’s meetings etc, were fully implemented.

Planned Activities for 2014/2015

1. Drilling of boreholes
2. Re-protection of springs
3. Rehabilitation of boreholes
4. Construction of VIP latrine at Rural Growth Centers
5. Water quality surveillance

Unfunded Priorities

- Construction of village piped water schemes
- Provision of Institutional Rain Water Harvesting Facilities
- Promotion of Domestic Rain Water Harvesting.
- Borehole Rehabilitation

The Major Constraints for the water sector include:

- Delayed release of funds for implementation of activities.
- Delayed procurement of service providers
- Laxity of some communities in keeping Water and sanitation facilities clean hence causing a situation of Poor hygiene and sanitation around water and sanitation facilities in the District;
- Poor operation and maintenance (O&M) of water facilities by the user communities is leading to frequent source breakdowns;
- Inadequate allocation from the district Local Revenue to the sub sector.
- Low technology options are exhausted hence; expensive options adopted .e.g. deep bore holes as opposed to protected springs and hand dug wells.
- Poor potential in some areas leading to the need for more expensive options like the piped water supplies.

RDC, Richard Gulume, LCV Fredrick Ngobi, Water Engineer plus other councilors during the commissioning of boreholes in Budondo Sub County.

Eng. Ereemye, Deputy RDC and some of the Councilors during commissioning of boreholes in Buwenge S/C

Councilor Balidawa Sarah, Hon. Tenywa Yakut and the RDC during the borehole commissioning

Community Driven Development Program (CDD)

- Procurement of chairs for Butagaya LC1 and LC11 Local leaders Association.
- Procurement of 90 plastic chairs for Kisambira progressive Association.

- Procurement of 60 plastic chairs for Mwiino Akuwa women's Group.
- Procurement of 100 plastic chairs for Akutola Awabi development Group.
- Procurement of 60 plastic chairs for Tukolere Walala development Group.
- Procurement of a Solar and Saloon Equipment for Buijja Bigereke Group.
- Procurement of an OX-Plough and 2 Oxen for Buwala Baseke Development Group.

NATIONAL AGRICULTURE ADVISORY SERVICES (NAADS)

- Procurement of 870kg of longe 6H maize.
- Procurement of 555kgs of K132 beans.
- 3. Procurement of 1,480 Banana sackers.
- 4. Procurement of 9 Dairy Friesian cows.
- Support to 3 market oriented fish farmers.
- 6. Procurement of 7,844 coffee seedlings.
- 7. Procurement of 1,398kg of DAP Fertilizers.
- Procurement of 37Ltrs of Thionex pesticides.

A maize mill under construction at Namagera Parish, Butagaya S/C (CAIIP Programme)

MAFUBIRA SUBCOUNTY

BACKGROUND;

Mafubira sub-county is located 4 Kms along Jinja- Kamuli high way and is composed of 5 parishes namely; Namulesa, Mafubira, Buwenda, Buwekula and Wanyange Parish., with a total of 33 villages.

The Sub-county Vision is “To have a vibrant sub-county with literate, well fed, healthy and productive people” and our mission is “To improve the standard of living of the wanaichi through delivery of improved services and welfare.

Achievements

LGMSD

Under this program, they received **50,631,115/=** from the central government and the following projects were funded and completed under the program LGMSD

- Procurement of 14 and 22 office chairs bookshelves to 11 government schools in the sub-county at a cost of 11,945,000/= . These include:- MM Wanyange Primary school, Kagogwa Primary School, Kalungami Primary School, Musima Primary School, Wakitaka Primary School, Lwanda Primary School, Namulesa Muslim P/School, Butiki Primary School, Buwenda Primary School, Mafubira Primary School and Kimasa Primary School.
- Payment of retention against works of rehabilitation of 5 water sources, at Shs.1, 448,527/=

- Procurement of 14 metallic chairs for the council hall at a cost of Shs. 990,000/=
- Payment of retention against Construction of a 4 stance Pit latrine at Lwanda Primary School at Shs. 2,630,407/=
- Established a tree Nursery Bed at Buwekula and distribution to the 11 Government Aided School in the Sub-county at a cost of 3,800,000/=
- Renovation of Musima Health Centre II at accost of Shs. 12,700,000/=
- Renovation of Lwanda Health Centre II at a cost of Shs.6, 806,341/=

COMMUNITY DRIVEN DEVELOPMENT (CDD)

Under this program, the sub-county received **21,699,049/=** and the following groups were funded.

- Procurement of plastic chairs and tents of 2,000,000 shs to Masjid Akswa in Buwenda parish.
- Supported Akaife Nakaife in Wanyange Parish with plastic chairs and tents of about 3,500,000shs.
- Supported Beaver Development Association in Namulesa Parish with plastic chairs and chairs of about 2,000,000 shs.
- Procured plastic chairs and tents to Lwanda Mwenewo group in Namulesa parish of 2,000,000shs.

- Supported Lesony Development Association in Buwenda Parish with plastic chairs of shs 2,500,000.
- Isukwe Development Association was given plastic chairs and tents of shs 2,000,000.

NAADS

Under NAADS they received **94,332,679/=** and the following were the achievements;

- AADS implementation and awareness meetings were carried out at village level in all the five parishes in Mafubira sub - county. All area councilors, LCI's, LC II'S and farmers were mobilized to attend.
- Planning meetings were carried out together with the Sub-county farmer forum and community based facilitators.
- Village procurement plans were developed and trainings on the procurement process carried out at village level. Records were captured in the NAADS database.
- Meetings to select enterprises and potential market oriented farmers (MOFs) were organized and selection done.
- Verification of market oriented farmers (MOFs) was carried out and four farmers selected per parish. A total of 20 market oriented farmers were selected.
- Over 7,000 coffee seedlings have been supplied to the farmers in all the 5 parishes of Mafubira.

- Under food security 12 farmers received, 600 broilers all together in the 5 parishes.
- A total of 350 kuroilers and 100 bags of feeds were supplied to the respective farmers in the 5 parishes
- A total of 1,950 banana tissues were delivered to 7 farmers in Mafubira sub-county
- A total of 4 heifers were purchased and distributed to farmers under market oriented category in all the 5 parishes.
- Monthly trainings and training of farmers has been conducted and is still going on. Reports for these activities are available.

- We have managed to pay up date salaries for the NAADS Staff i.e. Sub-county NAADS Supervisor and two Agriculture and Animal Husbandry Service Providers
- We also received one Motorcycle for NAADS programme to ease on the movement of the service providers in terms of monitoring activities.

ROAD FUND;

They received **20,646,112/=** under this program and three community access roads were opened on as shown below:-

- Nakabango School lane Access Road – 1 Km
- Ayubu - Badru Kafufu community Road - 0.8 Kms

- Nakabango - Akisoferi community Road – 4.3Kms

Challenges;

- Poor revenue mobilization as taxpayers are adamant to pay the money as stipulated in their agreements.
- Budget cuts for the releases from the central government
- Political interference/ intervention in the activities by some politicians
- Seasonal changes especially on the side of NAADS affecting the implementation of activities
- Delayed releases from the central Government which have affected timely

BUDONDO SUBCOUNTY

Sub county chief,
MUKUNGU MOSES

Budondo Sub County is one of the six rural sub counties in Jinja. It has five (5) parishes and a total of thirty eight (38) villages.

The population is 45,035(2002 census) and 8,502 households. The average house hold size is 5.3 (UBOS 2005). The sub county has an average land holding of 1.5 acres per house hold (UBOS 2005).

Achievements:

PRODUCTION

Using funding from NAADS, the sub county produced the following for farmer groups;

- 12 heifers for 12 farmers groups
- 1250 plantlets for 30 farmers
- 27 piglets
- 4242 coffee seedlings
- 1438 kgs of beans
- 210 kgs of maize
- 320 hoes
- 5 tins of tomatoes

ROAD FUNDS

- Opened Kyeroba-Nawangoma road 2.1 km.
- Opened Wagoola-Kabembe road 1.4km

CDD

- Produced two dairy cows for youths against literacy and poverty in Kibibi parish.

- Produced two (2) dairy cows for Mukisa women’s groups in Kivubuka village
- Produced two (2) dairy cows for Kibibi Elderly farmer’s groups in Kibibi parish.
- Produced two (2) dairy cows for Budondo post test club in Namizi central villages.
- Produced 75 plastic chairs for Kivubuka development association Invunamba parish.
- Produced 100 plastic chairs for Namizi modern women’s group in Namizi parish.

LGMSD

Relocation of Kibibi H/C ii has delayed the construction of 4 stance pit latrine council has however resolved to use funds for the renovation of facilities at Nawangoma H/C II.
